Arms Sales to Saudi Arabia: The Corporate Connection

By William D. Hartung and Derek Paulhus

Arms and Security Project, Center for International Policy

The U.S. arms sales relationship with Saudi Arabia is increasingly controversial as a result of the brutal Saudi bombing campaign in Yemen, which has [utilized](#) U.S.-supplied weaponry to target civilians, causing thousands of deaths in the process. The indiscriminate air strikes have [hit](#) marketplaces, hospitals, civilian neighborhoods, and even a funeral. The Saudi conduct of the bombing campaign has generated growing opposition in Congress, including an unprecedented [vote](#) by 47 members of the Senate to block a sale of precision-guided munitions to the Saudi Royal Air Force (RSAF) and a number of [amendments](#) to the House version of the National Defense Authorization Act for Fiscal Year 2018 that would restrict U.S. military support for the Saudi war effort in Yemen. And Sen. Todd Young (R-IN) and Sen. Jeff Merkley (D-OR) have each introduced amendments that would stop the sale of weapons to Saudi Arabia that could be used in its indiscriminate bombing campaign in Yemen.

This fact sheet provides information on arms offers to Saudi Arabia involving the four largest U.S. arms suppliers to that nation: Raytheon, Lockheed Martin, Boeing, and General Dynamics. The analysis covers offers

notified to Congress, not all of which have yet resulted in final deliveries of the relevant equipment; and data on weapons deliveries gathered from the Stockholm International Peace Research Institute (SIPRI) arms transfer database. Links are provided to relevant sources.

U.S. Arms Offers to Saudi Arabia, 2009 to 2017

This section covers arms offers to Saudi Arabia that have been officially notified to Congress since 2009. As noted above, not all of these offers will result in final sales, and some of them will take years to result in deliveries of the relevant equipment.

Nonetheless, this data provides a useful picture of the scope of U.S. arms offers to Saudi Arabia. The next section will provide estimates of equipment actually delivered to date. Links to descriptions of each weapon system are provided via links to the name of each system.

Raytheon

Raytheon is involved in 24 arms deals with Saudi Arabia including thousands of air-to-air and air-to-ground missiles and over 7,000 Paveway laser-guided bombs. The Paveway has been used in the Saudi bombing campaign in Yemen.
